Comfort

Case Study

In order to join the Smart charging pilot, the electric driver needs to have the following:

- 1) An energy contract at Vandebron
- 2) A smart meter
- 3) Home charger
- 4) Drive a Tesla

These requirements create a barrier for customers to join our pilot.

Road to solution

- Create groups of five
- Find in 30 minutes a solution to the proposed question
- Pitch your solution
- The best team will win
